Scope of Work

- Opening meeting to define audit scope, expectations, and site-specific requirements
- Comprehensive walkthrough of jobsite or facility to evaluate safety conditions
- Review of contractor safety performance and implementation of safety programs
- Evaluation of compliance with OSHA standards and client safety requirements
- Inspection of work practices related to LOTO, fall protection, electrical safety, PPE usage, and housekeeping
- Review of Pre-Task Hazard Analysis (PTHA/JHA) documentation and effectiveness

- Equipment inspection verification including ladders, scaffolds, MEWP/scissor lifts, and tools
- Review of safety training records and documentation for regulatory compliance
- Evaluation of incident reporting procedures and corrective action tracking
- Assessment of hazard identification and mitigation practices
- Interviews with supervisors and workers to evaluate safety awareness and implementation
- Identification of compliance gaps and risk exposure areas
- Detailed audit report including findings, observations, and recommended corrective actions
- Prioritized action plan to improve safety performance and reduce risk
- Support aligning safety practices with client, GC, and regulatory expectations
- Guidance for improving safety culture and program effectiveness
