Scope of Work – Data Center Projects

- Onsite safety leadership for construction, commissioning, and live data hall environments
- Pre-Task Hazard Analysis (PTHA/JHA) development and review for high-risk activities including energized work, LOTO, work at height, rigging, and material handling
- Daily jobsite safety inspections including MEWP/scissor lifts, ladders, scaffolds, tools, and PPE compliance
- Coordination with General Contractors, Electrical Contractors, Mechanical Contractors, and Client Representatives
- Support implementation of NFPA 70E, Arc Flash safety practices, and LOTO procedures

- Monitoring housekeeping practices to maintain safe and efficient work areas
- Incident prevention, hazard identification, and corrective action tracking
- Review of training records, safety documentation, and regulatory compliance alignment
- Participation in coordination meetings, safety meetings, and planning sessions
- Safety support from civil construction through cable installation, energization, and commissioning activities
